**DETAILED ACTION**

***Claim Rejections - 35 USC § 112***

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 14 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Examiner has searched the specification for "alignment points", but cannot find any mention of alignment points in the specification. Please revise the claim clearly claiming the invention based on the specification.

***Claim Rejections - 35 USC § 102***

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 9-11, 15-16 rejected under 35 U.S.C. 102(b) as being anticipated by Kauffman. Kauffman teaches a fixing device comprising a first section 25 that can be coupled to a vertical section of a crockery basket and a second section 24 extending substantially vertically forming a curve. The device can be removable or integrated (col 2 lines 45-55). The second portion can be elastically deformed manually. The first area can be construed as a connecting region having at least one receiving area suitable for fixing to a vertical basket. The device is capable of being attached to a cutlery basket.

5. Claims 9-10, 12-13, 15 rejected under 35 U.S.C. 102(b) as being anticipated by Patera et al. Patera discloses a fixing device comprising a first section 12 that can be coupled to a crockery basket, specifically a horizontal portion of the crockery basket. The second portion 30 is curved, and such that a vertical portion could be accommodated within its interrupted portion. The device could be fixed to a cutlery basket.

6. Claims 9-11, 14-15 rejected under 35 U.S.C. 102(b) as being anticipated by Pille. Pille discloses a fixing device comprising a first section attached to a vertical portion of a crockery basket (items 44, 56), a second curved section 36, wherein the first region additionally has a portion 48 pointing away in the direction of the second portion which functions as a retaining clip. The device can be fixed to a cutlery basket.

***Claim Rejections - 35 USC § 103***

7. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

8. Claims 12-13 rejected under 35 U.S.C. 103(a) as being unpatentable over Kauffman in view of Patera. Kauffman does not teach an interrupted clip and can be attached to a horizontal portion of the basket. Patera teaches a clip that can be attached to a horizontal portion and has an interrupted second portion. This device performs the same function of fixing. It would have been obvious at the time of

invention to modify Kauffman and use a horizontal clip with an interrupted second portion, as taught by Patera, in order to fix articles.
